“ *My name is Derrick Waddell, I am the son Larry Mack. I was only able to meet my grandmother once and am just hearing of her passing I have been disconnected from this side of my family for basically my entire life. Grandma Carrie made a special visit to see me when I was about 16 years old, I believe she was singing at the BB King club that weekend. She flew out early and spent a few days with me my mother and brothers in Vista, California. I remember her smile and the first hug she gave me, till this day I can still hear her voice and if I ever forget it I look up her album. Those few days I always cherished, she told me stories of her being a short cook and taught me how to cook something's that I still make yo this day. I remember her saying you gotta clean while you cook, cause you're a short order cook the next ticket was is always coming. After her visit we stayed in contact for a few years. The plan was for me to come to a family reunion at some point. I have no contact with my father or anyone on this side of my family. I do know that it was important to her that I meet and know my Mack family. I am expecting my first child in less than 6 weeks. If anyone would like to connect my phone # is 430-444-0225. I now reside in East Texas.*
